SUMMARY

Driven and curious individual passionate about designing purposeful solutions and improving user experiences. Committed to learning, adapting, and building with precision and creativity. Interested in understanding user needs and contributing to products that create meaningful impact.

EDUCATION

- B.E COMPUTER SCIENCE ENGINEERING** - St. Joseph's Institute of Technology (2022-2026) CGPA-8.95
- HIGHER SECONDARY** -Boaz Public School (2020-2022) GRADE- 75.6%

SKILLS

Programming Languages	Java, SQL, HTML, CSS
Database	MySQL, PostgreSQL
Framework	Spring Boot
Tools	GitHub, VS code
Core Competencies	Problem-Solving, Communication, Analytical Thinking, Creativity

EXPERIENCE

- Intern (Trainee) – Neurealm Private Limited (3 Months)** **2026 | Chennai, India**
- Contributed to backend feature development using Java, Spring Boot, and PostgreSQL while gaining exposure to the software development lifecycle.
 - Designed and tested RESTful APIs using Postman to support application functionality and system integration.
 - Collaborated on requirement understanding, debugging, and feature validation, strengthening problem-solving and cross-functional communication skills.

- Student Intern – Ashok Leyland Limited (3 Months)** **2026 | Chennai, India**
- Observed IT department operations, gaining exposure to enterprise software systems and support processes.
 - Learned about system analysis, troubleshooting workflows, and IT infrastructure management.
 - Gained basic knowledge of data management practices and software tools used in IT operations.

PROJECTS

- Drug Detection System** *Python, OpenCV, YOLOv8*
- Developed an AI-powered facial analysis system using computer vision and deep learning techniques to identify drug-affected individuals.
 - Implemented real-time webcam monitoring and image-based detection with image preprocessing and classification pipelines.
 - Integrated data storage and analysis workflows to support detection tracking and model evaluation.
- CyberNest – Child Online Safety App** *FastAPI, NLP, MongoDB, Android Studio*
- Developed an Android-based child safety application to detect harmful messages using NLP techniques.
 - Designed RESTful APIs using FastAPI and integrated MongoDB for secure data management.
 - Implemented real-time alerts and a monitoring dashboard to enhance child online protection.

CERTIFICATIONS AND ACHIEVEMENTS

- Database Management System -- NPTEL
- Design Thinking - A Primer – NPTEL
- Python for Data Science -- NPTEL
- 30 Days Cloud Challenge – Completed**
- Hack-A-Cloud 2.0 Cloud Hackathon – Participant**
